

Civil Engineering Accessories

Devices for the sealing test, location and inspection of pipes

MPG pipe sealing test equipment

WLAN-Option

- Compressed air test to EN 1610 (and others)
- Integrated safety fill-up valve fitting
- Graphics display and data memory for 50 tests
- Optional integrated strip test report printer
- Generation of test reports on the PC
- Integrated rechargeable battery supply, connection 230 V / 12 V
- Water, high pressure to EN 805 and gas pipe test expandable

With USB connection and PC software **3,100.- EUR** plus VAT.

Pipe and shaft testing set RPG-3

WLAN-Option

- Control unit with graphics display and data memory
- Integrated measurement unit for compressed air tests
- Level probe for shaft and separator tests
- Alternative supply 230 V / 12 V motor vehicle supply
- Optional rechargeable battery and compressor integrated
- Alternative testing using data memory or notebook

Set price **4,900.- EUR** plus VAT.

Locating set for non-metallic lines

- Easyloc CAM receiver with 33 kHz pig sensor
- Location and distance measurement up to 5 m line depth
- Intuitive operation, no training required
- Optional thrust linkage on 50 m eel reel
- Optional adapter for fixing to the RTV camera head

Set price **1,150.- EUR** plus VAT.

Inspection camera RTV-3 with digital video recorder

- Inspection and documentation of the pipes \varnothing 80 – 200
- Optional change head for diameters to \varnothing 350
- 50 m push camera on eel reel
- Automatic display placement (automatic horizon)
- waterproof TFT monitor with integrated SD-card recorder
- for taking pictures and recording inspection videos
- Metering counter and integrated data writing-in
- Optional TFT monitor case with integrated accumulator

Set price **5,400.- EUR** plus VAT., picture includes options
